

Appeal to raise £162,000 for Lulu's cancer treatment in New York

by July 2019*

Lulu has a great big smile that lights up the world. She's happy and full of life. But in January 2018, just months after starting school, she was diagnosed with high-risk neuroblastoma.

She immediately started chemotherapy and surgery, more chemo, stem cell harvest, high dose chemo, radiotherapy and immunotherapy followed.

Her family want Lulu to access treatment in New York – a clinical trial which is showing promise in reducing relapse rates, which near 50%. If that happened to Lulu, her chances of survival would drop to less than 1 in 10.

Her parents are launching an appeal to raise £162,000 and hope Lulu will be in remission to access the treatment in July.

You can give Lulu hope

To make a donation:

www.solvingkidscancer.org.uk/lulu

Text **LUDV99** and your amount **£1-10** to **70070**

To fundraise for Lulu, contact our Fundraising team for support on fundraising@solvingkidscancer.org.uk or 020 7284 0800.

Funds raised will go towards helping Lulu and her family. If Lulu no longer needs the funds or is in remission 5 years post the end of successful treatment, the funds will be used to support other children and families affected by neuroblastoma through our activities.

The fundraising target identified above combines the cost of treatment, the associated costs (e.g. travel and accommodation) as well as contingency for any unforeseen complications. For children with high-risk neuroblastoma, like Lulu, the survival rate is much lower than other childhood cancers. Upon relapse, this rate reduces even further to less than one in ten. Lulu has just started immunotherapy and the family hope she will be in remission when she has her end of treatment scans in May 2019.
